金属加工受控

STEEL PROCESS UNDER CONTROL

技术部 ENGINEERING

法骏公司拥有一体化的设计部门，可以运用2D和3D形式执行所有计算，设计和绘图，以达到最高水平精准度。借助我们自己的计算软件，可以为客户提供最优的响应力和最大的支持。

Using its integrated design office, FIPE performs all its calculations, designs and drawings, in 2D and 3D, in order to achieve the highest level of accuracy. With the use of our own in-house calculation software we are able to offer our client maximum support with optimum reactivity.

主要设备 MAIN MACHINES

1台十字埋弧焊机 |

高度: 4m, 臂长: 4m
焊接电源: 1200安培

1 sub-arc welding under flow |

Height: 4m - Arm length: 4m
Welding source: 1200A

1台卷板机 |

最大长度: 3m - 最大厚度: 110mm

1 rolling machine |

Max length: 3 m - Max thickness: 110 mm

1台折弯机 | 4m x 250t

1 bending machine | 4m x 250t

1台火焰 + 等离子切割机 |

规格 3m*15m - 最大厚度: 100mm

1 plasma HD cutting machine: oxycutting |

Capacity 3m x 15m - Max thickness: 100mm

2台自动焊接机器人 - 不锈钢 & 碳钢 |

操作台宽度: 3m - 最大高度: 110mm

焊接电源: 500安培

2 Automatic welding robot - Stainless steel & Carbon steel |

Table width: 3 m - Height max: 110 mm

Welding power supply: 500 A

1台H钢双头埋弧焊机 |

最大规格: 宽度 1250mm - 长度: 12m

1 WRB welding machine with 2 heads |

Max beam: 1 250 mm - Length: 12 m

等离子 - 氩弧焊宝利苏迪焊接臂 |

适用所有材料

Plasma (PAW) - TIG (GTAW) Polysoud™

welding arm |

All materials

生产 PRODUCTION

法骏公司专注于金属结构制造以及焊接组件，压力容器和管道拥有自己的制造车间，配备有最新一代的数控机床和装卸设备。

Specialized into metallic structure fabrication and welded assemblies, pressure vessels and piping, FIPE has its own manufacturing workshop equipped with the latest generation of CNC machining and handling equipment.

检查 CONTROL

通过了 ASME U-STAMP 和 EN1090-2+A1:2011 EXC3. 认证，法骏内部质检人员对所有制造的产品进行严格把关，承诺为客户提供最大程度的质量监控。车间的正确包装，确保了交付过程中产品的保存。

Certified ASME U-STAMP and EN1090-2+A1:2011 EXC3., FIPE guarantees maximum quality control to its clients, with in-house inspectors checking all the manufactured equipment. The right packaging made in our workshop guarantees the preservation of the products during delivery.
